Programming Skills

Languages: Python, HTML, CSS, SQL (**Basic:** Numpy, Pandas, OpenCV, Tkinter)

Concepts: DBMS, OOPS, Networking Essentials

Tools: MySQL Workbench, Power BI, GitHub, PyCharm, VS Code, Jupyter Notebook

Training / Internship

Python Training – DevTown (Remote)

Duration: 4 Weeks

- Enhanced coding proficiency and hands-on problem-solving using Python.
- Practiced real-world tasks and logic-building through structured modules and projects.

Chatbot – Bytes and Cookies Technologie (On- Site)

Duration: Sep 2025 - Present

- Developing an intelligent chatbot system to automate client interactions.
- Working with Python, HTML, MySQL and RESTful APIs to implement logic, backend integration and database.

Projects

Face Track – Face Recognition Attendance System | [GitHub](#)

Duration: 3 Weeks

- **Description:** AI-powered system that automates student attendance using real-time facial recognition.
- **Technologies Used:** Python, OpenCV, Tkinter, MySQL.
- Marked attendance via webcam and saved records in the database automatically.

Sales Insights Dashboard | [GitHub](#)

Duration: 2 Weeks

- **Description:** Power BI dashboard providing real-time sales and market performance insights.
- **Technologies Used:** Python, Power BI.
- Helped stakeholders identify trends and support strategic decision-making.

Voice Assistant – ALEX | [GitHub](#)

Duration: 2 Weeks

- **Description:** Python-based voice assistant that executes user commands through voice interaction.
- **Technologies Used:** Python, Speech Recognition, Pytsx3.
- Enabled voice-based searching, system control, and query execution.

ML Chatbot – VITA | [GitHub](#)

Duration: 1 Month

- **Description:** It provides a GUI where users can interact with the bot, ask FAQs, and solve basic math problems.
- **Technologies Used:** HTML, CSS, Python, Fast API, MySQL.
- Included secure login, real-time appointment tracking, and patient records.

Pulse Care – Healthcare Appointment System | [GitHub](#)

Duration: 5 Weeks

- **Description:** Web platform for managing doctor appointments, prescriptions, and admin access.
- **Technologies Used:** HTML, CSS, JavaScript, PHP.
- Included secure login, real-time appointment tracking, and patient records.

Education

Acropolis Institute of Technology and Research, Indore

Duration: 2021 – 2025

B. Tech in Computer Science and Engineering

CGPA: 8.10/10

Lokmanya Vidya Niketan, Indore

Senior Secondary (10+2) | PCM | 81.6%

High School (10th) | 75.8%

Duration: 2020 - 2021

Duration: 2018 - 2019

Accomplishments

- Achieved **Elite Rank** in **NPTEL DBMS** Certification.
- Completed **Deloitte Data Analytics Job Simulation** with verified certificate.
- Certified in **Python** by **Google Developer Group (GDG)**.
- Earned **Cisco Networking Essentials Certificate** with foundational networking skills.
- Conducted an **HTML Workshop** for a **Govt. School** as part of the **Village Connect Program**.
